## SKILLSETS

### Languages

Typescript  
Javascript ES5/ES8+  
CSS3  
PHP  
Golang  
Accessible HTML

### Technologies

ESlint/Prettier  
NodeJS/NPM  
GraphQL  
NextJS  
Gatsby  
React  
Redux  
Git  
Webpack  
Storybook  
Styled-Components  
MUI  
REST APIs

### Methodologies

Agile  
Scrum  
CI/CD  
Open Source  
Unit Testing  
SDLC  
UX/UI Design

## ME— IN A NUTSHELL

Hi there! Nice to meet ya. I'm a well-rounded —and driven!— software engineer looking to join an innovative team where I can hang my hat. My bachelors degree in web design/development, current professional experience, and absolute passion for all things programming would make me a valuable addition to your team.

## EXPERIENCE

### Webstacks

#### Software Engineer L2 (February 2022 - Current)

- Built and managed the Webstacks UI library/template repository utilizing React, Typescript, Styled Components, and Storybook for documentation. Increased the speed of new website builds by over 55% while reducing bugs, styling errors, and ramp time.
- As team lead, I worked with client stakeholders to re-architect their marketing site to a headless React SSG SPA utilizing DatoCMS, Gatsby, Typescript, and GraphQL. Responsible for sprint planning, peer & junior code reviews, and a 320% increase in Core Web Vitals.
- Constructed the logic and documentation for a streamlined paradigm to generate components and pages for the new Webstacks marketing site (Webstacks.com). The pattern increased content creator flexibility as well as component re-usability.
- Developed an internal CLI tool utilizing NodeJS and Typescript to recursively generate templated React components. Distributed the CLI tool via NPM to all team members and maintained the repository.

### Fidelitas Development

#### Web Design/Development Intern (December 2019 - April 2020)

- Designed and branded a responsive WordPress website (Kodiaklife.com) to provide outdoor survival information and revenue through affiliate links.
- Designed and developed pages and graphics for Office1.com adhering to strict brand guidelines, improving overall aesthetic and UX of the site creating a CTA click-rate increase of 21% on three landing pages measured over four months.

### American Alpine Club, San Diego Chapter

#### Board Member — Director of Media (January 2019 - January 2020)

- Designed and developed a Wordpress site as well as print materials and social media posts to promote events and membership leading to a 24% membership increase in 12 months.
- Planned, coordinated and led community events, meetings, and conferences to promote organizational goals, solicit donations or sponsorships, and support fundraising projects that increased the overall annual revenue of the San Diego Chapter by 12%

### United States Navy

#### Aviation Maintenance Manager (July 2006 - January 2020)

- Managed 1112 people in the scheduled and unscheduled maintenance of 42 MH-60S helicopters with a budget of \$630mil resulting in a 98% daily mission completion rate. (In other words, I can handle stress and work well under pressure).
- Managed 12 detachments to San Clemente Island leading 44 technicians on 6 H-60 aircraft through 1,152 flight hours with a 100% sortie completion rate. Essential in the deployment/recovery of \$187mil worth of gear as well as fighting the 4,100 acre Bonsall fire.

## EDUCATION

### Platt College San Diego (San Diego, CA)

BAS in Web Design & Development — **4.0 GPA** December 2019 - October 2022
